Education

Indiana University Bloomington

Cognitive Science B.S concentration: computation, Neuroscience Cert. *exp. May 2019*

Thesis: Hippocampal modes: the role of acetylcholine and theta (In progress)

Research Projects

With Dr. Ehren Newman: Neural Correlates of Learning and Memory *2015 - Present*

- Hippocampal mode switching computational model

  Investigating the interplay of acetylcholine and theta oscilations and their role of allowing the hippocampus to switch between internal and extrenal information processing by using biologically constrained computational models

- Traveling Theta Wave in the Entorhinal Cortex

  Coded signal processing analyses of electrophysiology data recorded from electrodes across the long axis of the MEC to test our hypothesis of a traveling theta oscillation

- CA1 Assembly Flouresence Imaging

  Spearheaded implementing portable fluorescence imaging by building miniature microscopes, configuring analysis software, and conducting survival viral injection and endoscopic implantation surgeries in mice towards the goal of studying long term CA1 assembly dynamics

- Optic Flow and Theta Modulation

  Constructed behavioral training set up which consisted of building an open field maze, projection system, and software, as well as conducted animal behavioral training to test the influence of optic manipulation on hippocampal theta modulation

With Dr. Mike Jones: Computational Cognitive Science, Artificial Intelligence *2018 - Present*

- Overcoming Catastrophic forgetting in connectionist embedding models.

  Investigated catastrophic forgetting in semantic connectionist models by using homophones as a measure of changes in learned word meaning, as well as applying neuroscience inspired consolidation algorithms to alleviate these shortcomings

With Dr. Fredric Schmitt: Philosophy of Mind *2018*

- Can the Machine Think? An evidence based approach .

  Applied neuroscientific findings to argue against the conclusions of the Chinese Room thought experiment

With Dr. Amit Hagar: History and Philosophy of Science; Quantum Computing *2017 - 2018*

- The Natural Computation of the Brain

  Used principals from the natural computation paradigm and complexity theory to add additional insight to findings from modern neuroscience

With Dr. Susanne Ressl: Biochemical Structure of proteins in Synaptic Connectivity *2015*

- Investigating the Structure of Membrane Protein YejM

  Conducted protein crystallography research consisting of growing cell cultures, extracting and purifying targeted proteins, electrophoresis, and crystal identification

- Predicting Hippocampal CA1 activity with machine learning
    Used recurrent neural networks to generate synthetic CA1 oscillatory output time series from CA3 input using openly shared electrophysiology data recorded from both regions
- Evolving neural networks to play games
    Designed genetic algorithms to generate neural network architectures and parameters to play a difficult popular mobile game to superhuman performance

As part of program
- fMRI Data analysis - with Dr. Tom James, Dr. Josh Brown
- Autonomous Robotics - with Dr. Randall Beer
- Human EEG - with Dr. Ben Ramsden

Publications

In preparation
   Hernandez, J., Cooper, K.W., Newman, E.L. ( ) Waveform changes of theta oscillations account for wide proportion of phase shift attributed to traveling waves in medial entorhinal cortex in behaving rats.

Published
   Cooper, KW. (in press). Can the Machine Understand? Indiana University Journal of Undergraduate Research, 4, XX-XX.

Abstracts/Presentations

Awards

Submitted

	NSF GRFP

Funded

2018	Ewing Prize
2018	Cognitive Science Outstanding Contribution Award
2017, 2018	Cognitive Science Research Award

Networks

PROFESSIONAL SOCIETIES
Indiana Academy of Science
Psi Chi

OTHER
ContinualAI.org, co-founder
Carboncopies, volunteer researcher
Student Organization for Cognitive Science, President
ADAPT Consulting, VP of Project Management

CONFERENCE COMMITTEE
Midwest Undergraduate Cognitive Science Conference, Bloomington 2018
Learning: Fast, Deep, and Shallow, Bloomington 2018

Pedagogy & Higher Education

UNDERGRADUATE CO-INSTRUCTOR
Programming in the Cognitive & Info Sciences (COGS-Q 260) Spring 2018
Computation in Cognitive Science (COGS-Q 320) Spring 2018

UNDERGRADUATE TEACHING ASSISTANT
Introduction to Neuroscience (PSY-P 346), Dr. Ehren Newman - Fall 2017
Cognitive Psychology (PSY-P 335), Dr. Franco Pestilli - Fall 2018

COMMITTEE SEATS
Education Policy Committee
Bloomington Faculty Council

Skills

Laboratory	Stereotaxic Rodent Neurosurgery, Histological Procedures/Sacrificial Perfusions, Signal Analysis, fMRI Analysis with Brain Voyager, Electrophoresis, Centrifucation, Cell Culturing
Computational	Python, MATLAB, HTML5/CSS, Java, R, UNIX/Bash
IT	APACHE/Ubuntu Server Initialization, Computer Assembly, Parallel Programming, SQL

Trainings, Workshops, etc.

Complexity Science Certificate, Santa Fe Institute
Science Communication Workshop
High Performance Computing and Supercomputing Workshop
Aseptic Surgery: Proper Practice Training
Viral Handling, Animal Handling, Institutional Animal Care Training
FERPA, Data Protection and Privacy, Title IX Trainings
IUNI Network Science Workshop
Neurosurgery Shadowing, Riley Hospital

Major Outreach and Service

Hoosier STARS, (co-founder, director)
Brain Club at the Boys and Girls Club
IU Science Fest
Kirkwood Observatory Guide
Celebrate Science Indiana
